44799 Bochum, Germany

## Reinforcing our growing business, we are looking for a **IT INFRASTRUCTURE ENGINEER (M/W)**

### WE ARE RIPS

RIPS Technologies is a fast growing technology company in Bochum, Germany. Our highly efficient software RIPS is able to automatically identify complex security vulnerabilities in web applications that no other tools are able to find. The underlying analysis engine was awarded, amongst others, with the Internet Defense Prize by Facebook. Our software is used worldwide by governments, large corporations as well as small and medium sized businesses and start-ups. By applying state-of-the-art technologies you help us to grow and improve our existing infrastructure.

### YOUR ROLE

- You set up and improve servers and services using "Infrastructure as Code"
- You coordinate the development with our infrastructure team
- You ensure accessibility and availability of our services to our teams
- You are advising our team concerning improvements and IT changes

### YOUR PROFILE

- Expert knowledge in Linux administration and orchestration
- Practical experience with Kubernetes, Docker, Chef, Ansible, and similar technologies
- Basic programming skills with Ruby, Python, Bash, or similar languages
- Development and administration tools, e.g. Git, Jira, Wireshark, are familiar to you
- Basic knowledge of IT security rounds up your profile

### YOUR BENEFITS

- Join a highly motivated team and become an integral part of the RIPS family
- Work with leading experts in information security and a superior product
- Work in a major position with excellent development options on international platforms
- Attractive salary and additional pension scheme
- Flexible working hours and regular team events
