RIPS Technologies GmbH

ripstech.com
Universitätsstr. 142
44799 Bochum, Germany

Reinforcing our growing business, we are looking for a

SOFTWARE ENGINEER (M/W)

WE ARE RIPS

RIPS Technologies is a fast growing technology company in Bochum, Germany. Our highly efficient software RIPS is able to automatically identify complex security vulnerabilities in web applications that no other tools are able to find. The underlying analysis engine was awarded, amongst others, with the Internet Defense Prize by Facebook. Our software is used worldwide by governments, large corporations as well as small and medium sized businesses and start-ups. You are a professional Java developer who increases the value of our Java team with excellent code knowledge and high-quality coding standards.

YOUR ROLE

- You design, build, and maintain efficient, reliable, and compatible code
- You implement modules that connect with our API (api.ripstech.com)
- You implement plugins to integrate RIPS code analysis with third-party products
- You implement plugin frontends to display RIPS analysis results

YOUR PROFILE

- You completed your studies in computer science or similar field
- You gained 2 years of practical programming experience with Java
- Ideally, you have experience with enterprise level frameworks
- Development tools, e.g. Git, Jira, Unit Test etc., are familiar to you
- Basic knowledge of web security rounds up your profile

YOUR BENEFITS

- Join a highly motivated team and become an integral part of the RIPS family
- Work with leading experts in information security and a superior product
- Work in a major position with excellent development options on international platforms
- Attractive salary and additional pension scheme
- Flexible working hours and regular team events

Please send us your application via email to:
